

The daily Argus Americas Biofuels report offers in-depth coverage of spot market deals, bids and offers available in the trading day, not a snapshot of market conditions at a brief moment in time. In addition, Argus publishes comprehensive tables of deals done for ethanol, RINs and biodiesel in order to support price transparency. Argus Americas coverage of ethanol, biodiesel, renewable diesel, sustainable aviation fuel, renewable feedstocks, and US RINs prices represent the low and high of deals done throughout the trading day.

## Markets covered

Renewable diesel

+

Sustainable aviation fuel (SAF)

+

Renewable feedstocks

+

Biodiesel

+

Ethanol

+

RIN, LCFS, Benzene and Tier 3 sulphur credits

## Features

Renewable diesel margin indicators at the USGC

Renewable volume obligation

Ethanol forward curves for Chicago and New York

Blender's tax credit (BTC) coverage and 50:50 split price assessment

Latin America coverage including, Brazilian ethanol and biodiesel and Argentinian biodiesel

Market moving news and analysis, including:

- Chicago Rule 11 ethanol spot pricing
- New York Harbor fob biodiesel barges
- California R99 and FAME B99 quotes
- Used cooking oil and distillers corn oil pricing

## The move towards renewable fuels

Argus provides in-depth pricing and market analysis across the entire renewable fuel supply chain, from original feedstock to final product price. Argus' industry leading coverage includes 42 renewable feedstock assessments covering used cooking oil, animal fats and grease and two California R99 renewable diesel assessments. Along with 75+ renewable feedstock and renewable fuel assessments across the globe. Providing you with detailed insight of profit margins with superior market analysis on supply chain economics and fundamentals. Argus' more responsive market assessments provide true executable value in sourcing and supply procurement, giving you information and instruments you need to make profitable decisions.

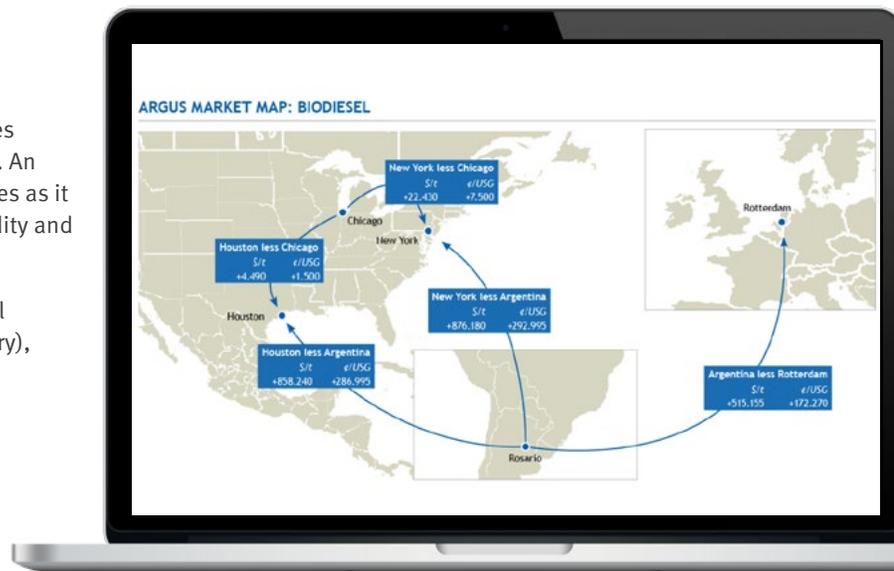

## Argus US RIN prices are trusted

Argus RIN prices are trusted because they reflect market prices across the entire trading day as a low and high of deals done. An entire day price is a reliable indicator of physical market values as it incorporates the broadest possible pool of spot market liquidity and has acceptance from industry.

Argus publishes daily RINs prices for Ethanol (Renewable Fuel D6 category), Advanced Biofuel (Advanced Biofuel D5 category), Biodiesel (Biomass-based Diesel D4 category) and Cellulosic (Cellulosic Biofuel D3 category). Argus assess current year and previous year RINs.

## Argus prices used globally in indexation

Argus works closely with the industry to develop market-appropriate pricing methodologies. As a result, the Argus approach has been widely adopted across US energy markets. In clean products, US refiners are converting gasoline and diesel contracts to an Argus basis, and also ethanol and biodiesel contracts. In crude oil markets, Argus is the primary index in domestic crude and the Argus Sour Crude Index (ASCI) is used as the price index for Middle East imports into the US.
