Key questions addressed by Argus NPK Analytics

Key themes addressed by Argus NPK Analytics include:

- What has Ukraine's ban on Russian product in 2019 meant for global trade? Which producers and NPK grades have filled the void, and where has the Russian product been diverted to?
- How has Nigeria's ban on compound NPK import changed the West African landscape? Where has Moroccan product been diverted to? How long could this trade barrier persist?
- With the lowering of the Chinese export tax in 2018, how much have the exports grown, and how much of a risk does this pose to the regional and global markets in the long-term?
- Where will new NPK capacity be located, and what are the chances of these projects coming online?
