# Argus and Oleochem Analytics Frequently Asked Questions

## 1. Who is Argus?

Argus is an independent media organisation with almost 1,100 staff. It is headquartered in London and has 26 offices in the world's principal commodity trading and production centres. Argus produces price assessments, news and analysis for international commodities and energy markets, and offers bespoke consulting services and industry-leading conferences.

## 2. Why did Argus acquire Oleochem Analytics?

Oleochem Analytics is an excellent and natural extension of Argus' already strong capabilities in coverage of renewables markets and complements our growth strategy. With its high-quality products and favourable market tailwinds, it has attracted a very impressive customer base. We are very pleased to be adding Oleochem Analytics market experts with unparalleled sector expertise to the Argus team, further expanding our chemicals coverage to serve our customers.

## 3. How will this affect the services I currently receive from Oleochem Analytics?

In the short-term your service will remain unchanged. Argus and Oleochem Analytics are working closely to align business processes and integrate the product offering. Together, we will be able to further enhance the existing product portfolio and better serve existing and new customers. Customers will be appropriately informed about any changes throughout the transition period and we will ensure there is no disruption to the service.

## 4. I'm only an Oleochem Analytics subscriber and I want to see Argus data; how can I do this?

Please contact [sales@argusmedia.com](mailto:sales@argusmedia.com) to get more information about Argus services.

## 5. Will the Oleochem Analytics methodology change?

Oleochem Analytics' methodology was designed by some of the leading experts in the market and is consistent with the approach taken by Argus for similar markets. There will therefore be no fundamental changes to the methodology. Argus will augment and elaborate on OA's methodology documents to bring them into line with best practices as laid down by IOSCO, the International Organisation of Securities Commissions. In some cases, inputs to pricing calculations may take advantage of commodities prices, or freight rates, already being produced by Argus to increase the accuracy of market measurement.

## 6. How is my personal data being used? Is it being transferred between Oleochem Analytics and Argus?

Personal information is used by Oleochem Analytics for the purpose for which it was initially collected and may be used for other purposes by Oleochem and other Argus group companies as described in our privacy policy which can be found at <https://www.argusmedia.com/en/privacy-policy>. This processing activity may include the transfer of personal information from Oleochem Analytics to other companies in the Argus group both within and outside of the EEA.

## 7. Who should I contact with questions?
